

ROTUTU MEMBERS

Flavour notes

GRAPE / PERSIMMON / SILKY

Next up for espresso subscribers is the exclusive Rotutu Members from Letefoho, East Timor! This lot was a first-year experimental project where the producers washed, fermented and dried their own lots. In the past harvest season, Karst Organics, our sourcing partner in the region, made a detailed renovation of their protocols using moisture content and water activity, with our green buyer Jamie having a small part in this in our discussions about water, best practices and equipment recommendations. Noticing an improvement in quality, flavours are clearer and more striking, which is demonstrated in Rotutu's subtle floral characteristics. Delicate and silky with notes of grape and persimmon, this coffee will definitely sweeten up your morning shots.
