

PLAZA DE ARMAS

Flavour notes

GREEN APPLE / ALMOND / HONEY

An exclusive chosen for espresso subscribers, Plaza de Armas from Cajamarca, Peru is your pick of the week! A community lot, this brings together farmers within the Jaén district, with roughly 30% coming specifically from the El Paraíso Village. Named after a landmark in the capital city of Jaén, the Plaza de Armas is a gathering place, reflecting the different contributors of coffee perfectly! Our partners Falcon suggest that the producers of the area 'have incredible potential and could produce some of the best coffees in all of Latin America'. However, due to poor advice and the growing of the Catimor variety in high altitudes, produce can be inconsistent. Alongside the field staff at Falcon, they're working together to improve quality and production, while providing a better insight into farm management.
