

SUMAVA

Flavour notes

BLACKCURRANT / CHOCOLATE / ROSE

Previously appearing in our offerings since 2015, we're excited to welcome back Sumava from West Valley, Costa Rica as this weeks subscriber exclusive! A new addition to our espresso lineup, we wanted you to have the opportunity to also try this as a tasty filter. A coffee which established our long-time partnership with coffee exporter Francisco A. Mena (who's export company 'Exclusive Coffees' you might recognise from Red Brick staple component Puente Tarrazu), Sumava coffee has become a core part in our Costa Rican selection over the years. Francisco's vision is bigger than growing coffee. Conducting research on the farm, offering education programs and building worldwide networks, Sumava is growing to be an exemplary model for the future of coffee. A natural process lot, its sweet and colourful characteristics utterly shine with notes of blackcurrant, chocolate and fragrant rose.
