

# AXOLA

*Flavour notes*

**RED APPLE / CHOCOLATE / HAZELNUT**

A subscriber exclusive, Axola is here to add a sweet yet crisp quality to your brew. Making its Square Mile debut as a component in the current Filter Blend, this filter embodies some of the classic caramelised and fruit qualities typical of Guatemalan coffee, with notes of red apple and hazelnut standing out. Founded in 1989, the Axola Cooperative started with 39 members and since then, has grown to 150, with most being of the Popti indigenous group. Based in the community of Petatán, they work together to market and sell their high quality coffee. As well as focusing on the environmental factors in their mission, they also prioritise the involvement and value of women farmers. In 2020, they obtained a certification through MAYACERT to celebrate coffees produced by women farmers!
