

TELILA KOLLA

Flavour notes

APRICOT / PEACH / HONEY

A filter subscriber exclusive, Telila Kolla fills your cup with sunset hues of peach and apricot. Produced in Jimma, Ethiopia, this coffee embodies the complex, fruit punch flavours the country is renowned for. This year, we eagerly chose three lots for you to enjoy. This lot was produced in the Kolla Kebele and processed at Telila's new, second site named Atoma Washing Station. Becoming a staple in our offering over the years, Telila Washing station's produce continues to impress, so much so that you might have also noticed it in our current Decaf Espresso, Decaf Filter and a component in Red Brick. Tasting as wonderful as ever, its classic profile of bright stone fruit balanced with a smooth honey texture continues to showcase Telila's incredible consistency. A partnership that continues to shine, we can't wait for you to experience the joy that is Telila Kolla.
