Altitude: 1500-1650 MASL  
Landed: May

 ESPRESSO

## TASTING NOTES

RAISIN / HAZELNUT / CACOA NIBS

It's time to welcome back Chacayá from the volcanic hillsides surrounding Lake Atitlán! Chocolatey with raisin and hazelnut in the mix - this coffee screams the perfect morning cup.

A key Red Brick component, the project to build this supply chain with our exporter/miller partners, Los Volcanes Coffee, began in 2021. To make enough volume for Red Brick, we had to cast our net wide with the Farms of Atitlán regional blend, with the intention of eventually focusing on a singular producer group. A huge success, we've been working closely with the Santiago-based group, Chacayá, and its group leader, Andrés Tziná, since 2023. In collaboration with Los Volcanes, the excellent quality and rapid growth of Chacayá have resulted in a third consecutive year of fulfilling a container exclusively for Red Brick and our subscription offerings.

Additionally, Los Volcanes continues to invest in this area and its supply chain by distributing plants to local producer groups from its nursery and overseeing the planting of these projects.
