

SACUANJOCHÉ JAVA

TASTING NOTES

BAKED APPLE / HONEY / CREAMY

A subscriber exclusive, Sacuanjoché Java from Jinotega brings warming comfort to your cup. A rich, creamy mouthfeel supports flavours of baked apple and smooth honey.

Brought to us by Caravela's export operation in Nicaragua, this mini-blend showcases a particular Arabica variety: Java. The three contributing producers in the Jinotega region, along with a few others from neighbouring Nueva Segovia, planted this Ethiopian landrace as an experiment.

The variety requires minimal fertilizer, has a reputation for great cup quality, and is known for resistance to diseases like leaf rust. Caravela's team at the dry mill and buying station combines Java lots from the group to create the blends, named for the Sacuanjoché flower found in the region.

Coffee: Sacuanjoché Java
Country: Nicaragua
Region: Jinotega
Producers: Three Smallholders
Roast Level: Medium
Varieties: Java
Process: White Honey
Altitude: 1100-1500 MASL
Landed: August
