

# SHOONDHISA

## TASTING NOTES

PEACH / MANGO / JAMMY

A flavour explosion with every sip, Shoondhisa is back for another year!

Produced in the region of Guji, Ethiopia by Dambi Udo Drying Station, this filter packs a serious stone fruit punch. While we've been partners with Sookoo, the grower, processor, and exporter responsible for many delicious Guji coffees, we've been purchasing this particular lot since 2023.

Bright and balanced, this year's lot has sparkles of mango, peach and a jammy texture shining through, just in time for your summer coffee selection. A delightful choice for your afternoon pick me up or sharing at brunch, we can't wait for you to fill your cup with Shoondhisa!
