

MBEWE

TASTING NOTES

BLACKBERRY / ELDERFLOWER / JUICY

Tanzanian Mbeve is your subscriber pick of the week!

Produced in the region of Songwe by the Mbeve AMCOS (Agricultural Marketing Cooperative Society), this local cooperative thrives on the initiative of supporting farmers in Tanzania. The society helps increase the potential of the farmers work and livelihoods by offering advice focusing on agriculture, marketing and access to quality resources such as seeds and fertiliser. Bright and berry driven, Mbeve offers a delightful insight into the fruity, yet rich coffee profile typically associated with Tanzania.

Blooming with freshly picked blackberries and fragrant elderflower, this filter is ideal for sunny, spring days. So good in fact, you can also try Mbeve as a component in the newest iteration of Sweetshop!
